

NEW A2L AKOGAS DETECTOR

Make Security Your Priority

AKO-57624

Detector de Gases A2L
Compatible con:

- R-32
- R-454A
- R-455A
- R-1234yf
- R-454C

1

GREATER RELIABILITY

Its robust IP68 enclosure and anti-condensation compensation system ensures the elimination of false alarms due to humidity, the greatest enemy of gas detection.

2

INCREASED FLEXIBILITY

Features two alarm and pre-alarm sets to suit each application:
1,000/1500 ppm or 2,000/4,000 ppm.
The pre-alarm can also be disabled if not required.

3

INSTALLATION COST

Reduces cost and installation time thanks to its various fixing modes, compact size and compression gland included to ensure tightness and easy commissioning with a single push-button.

4

MAXIMUM INTEGRATION

Our gas detection solution can be integrated with third party systems thanks to its alarm relay, 4-20mA signal, or by means of MODBUS communication (with open protocol).

5

LEGAL COMPLIANCE

As with all AKO products, the new AKOGAS A2L detector strictly complies with EN-378, EN-14624 and F-GAS standards.
