

Dear client and friend,

We would like to inform you that following the entry into force of RD 463/2020 dated 14 March, declaring the state of alarm, the **AKO Group** has enabled all the necessary mechanisms to continue providing all our services.

The decree focuses on the need to safeguard people's security and to ensure business activity continuity, mitigating the social and economic impact during this particularly difficult period.

At **AKO**, we will make every effort to help stop the spread of Covid-19, complying with the guidelines and recommendations issued by the authorities

Therefore, knowing the responsibility we have, we would like to inform you that our office team will continue operating under remote work protocols in order to ensure the provision of the required services.

At the same time, our production centres are still open and our material supply capacity remains intact.

In the event of any significant change in this stable situation, we will inform you as soon as possible.

We wish to provide, to the best of our ability, support and help to all those companies in sectors that are particularly vulnerable to the threat, with measures that aim to guarantee their business activity during and after the health crisis.

Finally, **AKO's** workers would like to thank the people in the agri-food sector, the food and transport industry, and the food centres for the efforts they have been making to ensure the supply of food and essentials to the population. We would also like to express our appreciation and admiration for the health personnel who are working to safeguard our health.

If you have any questions, your **AKO** contact will be happy to answer them through the usual channels.

Warm regards,

March, 17th 2020
